I. INN LIST 80

1. After the publication of Doc. 42.193, the Secretariat received, from the WHO, a new INN list (List 80) which contains 76 products. As the INN list will be incorporated in the WTO Agreement on Trade in Pharmaceuticals, it is necessary to determine their HS classification as soon as possible. The list is reproduced in the Annex to this document, together with the Secretariat's proposal concerning the classification of these products. In respect of certain products, the Secretariat has proposed more than one classification (placed in square brackets) in the absence of sufficient information. The chemical structures of the products concerned will be made available to delegates during the meeting.

II. CONCLUSION

2. The Sub-Committee is invited to examine the classification of the 76 products in the appended INN List 80 when considering this Agenda item on the basis of Doc. 42.193.
